ABOUT ME

As a Frontend Developer, I build and optimize websites and web applications for scalability and performance. With a keen eye for design and meticulous attention to detail, I deliver pixel-perfect implementations and seamless user interfaces to ensure the best user experience.

EDUCATION

BACHELOR OF SCIENCE
University of Ibadan, Ibadan 2019

Bachelor of Science in the Department of Biomedical Laboratory Science.

- Strong analytical skills

WORK EXPERIENCE

- FRONTEND DEVELOPER** | *Dojah* | *Lagos* | *Aug 2021 - Present*
- Developed user interfaces using JavaScript, React.js, and Next.js, resulting in a 40% increase in new sign-ups and goal completions.
 - Optimized code and images to improve web performance, achieving a Lighthouse score of 70%, and enhancing user experience.
 - Implemented sound SEO principles to increase online traffic by 15% and reduce bounce rate by 18%.
 - Designed React components with Tailwind CSS to ensure consistent styling and boost productivity by 40%.
 - Moderated and revamped end-to-end products using Agile and SCRUM frameworks, achieving successful outcomes and leading to a 15% increase in customer satisfaction ratings.
 - Received recognition for strong performance and contribution to the organization, resulting in a significant raise within 10 months.

- Selected Project Experience:
- Launch of New Web Application and Website:
- Built a new website from scratch, creating a user-friendly and responsive design that increased website traffic by 25%, resulting in a 10% increase in leads generated.
 - Played a critical role in the development of a new web application, contributing significantly to its design, implementation, and launch, resulting in a 50% increase in user engagement.
 - Collaborated with cross-functional teams, including product management and design, to ensure alignment and successful execution of the web application and website projects, which saved the company 10% in development costs.
 - Received recognition from senior leadership for contributions to the company's digital transformation efforts.

- FRONTEND DEVELOPER** | *Outlierz* | *Lagos* | *Jan 2021 - Jul 2021*
- Contract**
- Collaborated with a team of engineers and product designers to establish engineering standards, design, and architecture for the product, resulting in a high-quality and scalable web application, which reduced development costs by 20%.
 - Built the entire website from start to finish, ensuring pixel-perfect design and optimal cross-browser and multi-platform compatibility, which resulted in a 15% increase in website traffic.
 - Developed new components from scratch, providing seamless functionality and an enhanced user experience, which led to a 25% increase in user engagement.
 - Utilized various optimization techniques, resulting in a Time to Interactive (TTI) of 1.6 seconds and a performance rating of over 80% using Google's Lighthouse tool, which improved website speed and reduced bounce rate by 10%.
 - Contributed to the successful launch of the product, which received positive feedback from customers and stakeholders.

Stack: JavaScript, React.js, HTML / HTML5, CSS / SASS, git / github, npm

- PRODUCT DESIGNER** | *Decasoft* | *Lagos* | *Feb 2021 - Apr 2021*
- Contract**
- Drove the project through user research, creating storyboard and user flow, brainstorming, copywriting, and creating low-fidelity and high-fidelity wireframe prototypes using Figma.
 - I managed regular sync with stakeholders, incorporated feedback, and iterated efficiently. QA tested upon launch.
 - Developed a scalable and flexible design system to streamline the user experience.

Stack: Figma, Notion

PROJECTS

- SITESNAP** | *Lagos* | *Oct 2022 - Jan 2023*
- Developed and launched Sitesnap, a website that curates and tracks several companies across different industries, showcasing the latest designs for users to learn and draw inspiration from.
- <https://sitesnap.design>
- Built and launched "SiteSnap.Design," a platform for discovering and learning from top websites, with over 600 companies, 20 industries, and 14 webpages, and counting, resulting in over 500 active users and a 40% increase in engagement.
 - Received positive feedback from users who found the platform valuable in learning about design trends and best practices, resulting in a 15% increase in customer satisfaction.
 - Grew the platform's user base and engagement through effective marketing and promotion strategies, resulting in a 50% increase in traffic.

Stack: Typescript, React.js, Next.js, Tailwindcss, Strapi, Digital ocean, Cloudinary, Figma, Notion

- DO DEEL** | *Lagos*
- Developed the admin dashboard and landing page for a mobile application that automated the digital onboarding process for CDS across more than 10 states in Nigeria.
- <https://www.dodeelcdfs.com.ng>
- Co-led a team of over thirty engineers, designers, and managers as Product Manager, Designer, and Frontend Developer, resulting in a successful launch of the product on time and within budget.
 - Structured user interfaces and launched a landing page and admin application, resulting in a 15% increase in user engagement.
 - Developed projects from design through completion, optimized cross-browser and multi-platform compatibility, and improved user experiences using JavaScript, React.js, Gatsby, Redux, and Firebase, which resulted in a 50% increase in user satisfaction.
 - Implemented a real-time chat system for users to share live information during educational sessions, which increased user engagement by 40%.
 - Collaborated remotely with team members from different departments and actively participated in weekly brainstorming sessions, resulting in a more cohesive and effective team.

Stack: JavaScript, React.js, Redux, Gatsby, HTML / HTML5, CSS / SASS, git / github, npm, Figma, Notion, Firebase

INTERNSHIP

- FRONTEND DEVELOPER** | *Zuri Team* | *Lagos* | *Feb 2021 - Jun 2021*
- Completed a rigorous 5-month full-time Web Development Immersive Program, mastering web development skills through intensive training, programming projects, code challenges, and presentations.
- Led a team of 20 remote engineers and designers to build an Escrow platform for B2C companies, resulting in a successful launch of the product on time and within budget.
 - Built pixel-perfect, responsive user interfaces and collaborated on engineering standards, design, and architecture decisions, which led to a 40% increase in user satisfaction.
 - Designed user interfaces using Figma to achieve usability and visual appeal.
